OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Present	Anadromous
Sockeye	6/28/95	Yes	?	Yes	<input checked="" type="checkbox"/>
Dolly Varden	6/28/95	?	Yes	Yes	<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>
					<input type="checkbox"/>

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: Site sampled during an ADF&G, Habitat and Restoration Division, fish habitat survey of the Crescent River area. Adult sockeye carcasses were collected along the gravel bar adjacent to the channel. The stream gradient increases upstream of sample station. See the attached survey form and aerial photo for details.

Name of Observer (please print)

Michael Wiedmer, Habitat Biologist

Date: 12/13/96
